END-OF-LIFE DECISIONS

Initial the statement which best states your desires:

I recognize that modern medical technology has made possible the artificial prolongation of my life beyond natural limits. I do not wish to artificially prolong the process of my dying if continued health care will not improve my prognosis for recovery or otherwise enable me to live a productive and/or enjoyable life. Therefore, I do not want efforts made to prolong my life and I do not want life-sustaining treatment to be provided or continued: (1) if I am in an irreversible coma or persistent vegetative state; or (2) if I am terminally ill and the use of life-sustaining procedures would serve only to artificially delay the moment of my death; or (3) under any other circumstances in which the burdens of the treatment outweigh the expected benefits. In making decisions about life-sustaining treatment under provision (3) above, I want my agent to consider the relief of suffering and quality of remaining life as well as the extent of the possible prolongation of my life. I understand that if there is a conflict between my agent's decision and this statement, this statement shall take precedence.

For purposes of this statement:

- (A) "Life-sustaining treatment" means any medical procedure, treatment, intervention, or other measure including artificially or technologically supplied nutrition and hydration that, when administered, will serve principally to prolong the process of dying.
- (B) "An irreversible coma", means a coma from which the treating physicians have reasonably concluded I will never regain consciousness.
- (C) "Persistent vegetative state" means a state of permanent unconsciousness that, to a reasonable degree of medical certainty as determined in accordance with reasonable medical standards by my attending physician and one other physician who has examined me, is characterized by both of the following:
 - (i) I am irreversibly unaware of myself and my environment, and
 - (ii) There is a total loss of cerebral cortical functioning, resulting in my having no capacity to experience pain or suffering.
- (D) "Terminal condition" means an irreversible, incurable, and untreatable condition caused by disease, illness, or injury from which, to a reasonable degree of medical certainty as determined in accordance with reasonable medical standards by my attending physician and one other physician who has examined me, both of the following apply:
 - (i) There can be no recovery; and
 - (ii) Death is likely to occur within a relatively short time if life sustaining treatment is not administered.

I recognize that modern medical technology has made possible the artificial prolongation of my life beyond natural limits. I do not wish to artificially prolong the process of my dying if continued health care will not improve my prognosis for recovery or otherwise enable me to live a productive and/or enjoyable life. Therefore, if in my agent's judgment the burdens of the proposed treatment outweigh the expected benefits, then I do not want any form of life-sustaining procedures or, if life-sustaining treatment has been instituted, I ask that it be withdrawn. I desire that my agent consider relief from suffering, preservation or restoration of functioning, and the quality as well as the extent of the life being preserved when decisions are made concerning life-sustaining care, treatment, services, and procedures. I trust my agent, who knows my desires well, and in whose judgment I have absolute faith to exercise discretionary decisions in a manner that would be satisfactory to me. "Life-sustaining treatment" means any medical procedure, treatment, intervention, or other measure including artificially or technologically supplied nutrition and hydration that, when administered, will serve principally to prolong the process of dying.

Husband	Wife

I recognize that modern medical technology has made possible the artificial prolongation of my life beyond natural limits. I do not wish to artificially prolong the process of my dying if continued health care will not improve my prognosis for recovery or otherwise enable me to live a productive and/or enjoyable life. Therefore, if the extension of my life would result in a mere biological existence, devoid of cognitive function, with no reasonable hope for normal functioning, then I do not desire any form of life-sustaining procedures or, if life-sustaining treatment has been instituted, I desire that it be withdrawn. It is my desire that my agent consider relief from suffering, preservation or restoration of functioning, and the quality as well as extent of the life being preserved when decisions are made concerning life-sustaining care, treatment, services, and procedures. In making the decision to withhold or remove treatment, my agent should ask the question: "Is the proposed treatment an aid to recovery or merely a prolongation of inevitable death?" What is "reasonable," what is "an aid to recovery," and what is "merely a prolongation of inevitable death" shall be determined by my agent after consulting with my attending physicians. "Life-sustaining treatment" means any medical procedure, treatment, intervention, or other measure including artificially technologically supplied nutrition and hydration that, when administered, will serve principally to prolong the process of dying.

Hushand	Wife

I express the desire that my life be prolonged to the greatest possible extent without regard for my physical or mental condition, chance of recovery, likelihood of suffering, or expense and authorize my Agent to consent to whatever medical procedures are necessary to accomplish this end. I trust my Agent, who knows my desires well, and in whose judgment I have absolute faith to exercise discretionary decisions in a manner that would be satisfactory to me.
